I. Introduction.

In the lesson “Building Spiritual Movements,” we looked at the essential **ingredients** and **activities** needed to build a movement. The essential ingredients below are necessary for a movement to take place. The activities are used in order to see the movement take place. The ingredients reflect the philosophy behind the activities.

Seven Essential **Ingredients** Necessary to Build a Movement

- A. A common goal: The Great Commission.
- B. A common strategy: expose, win, build, train, and send.
- C. A common method: initiative evangelism and spiritual multiplication.
- D. Common tools and materials.
- E. A common power: the Holy Spirit.
- F. Increasing commitment to the goal (by developing personal convictions).
- G. Critical Mass: the amount of committed people needed to pursue it’s goals.

Seven Essential Ongoing **Activities** Necessary to Build a Movement

- A. Mobilize concerted prayer.
- B. Sow broadly and reap.
- C. Filter out ripe fruit.
- D. Build multiplying disciples.
- E. Build personal conviction.
- F. Establish credibility.
- G. Develop leadership.

In this lesson, we are going to look at the critical activities. Our calling to a ministry of multiplication involves our participation in sharing the good news with everyone who will listen

and giving those who respond to the gospel an opportunity for follow-up, ministry training, and discipleship so as to bring them to effective service in fulfilling their part in the Great Commission. There are four necessary actions for accomplishing this strategy: expose, win, build, and send.

II. Step One: Expose.

A. What we do: Sow broadly and use filters to find ripe fruit.

B. Why we do it: To identify interested people, to pinpoint where the Holy Spirit is working, and to give everyone an opportunity to hear the Gospel.

Note to instructor:

Option one: Break the class into small groups. Give each group the assignment of coming up with additional "Primary Methods" and "Primary Resources" for one of the actions. After about 7 minutes, have them report to the class what they came up with. See if the class had any other suggestions for that particular action.

Option two: Instead of breaking them into groups to discuss additional "Primary Methods" and "Primary Resources," have the whole class share the ideas they came up with for each of the actions.

C. Primary methods:

1. Pre-evangelistic events e.g. classroom speaking, team meetings, felt need talks
